

INCLINE EDUCATION FUND

\$50,000 in Out-of-Basin Funding Comes to Incline High School to support Engineering Literacy

In its' largest grant award to date, the Incline Education Fund was selected by the Washoe County Community Reinvestment Grant Program to receive \$50,000 in American Rescue Plan Act (APRA) federal grant funds to support the new Incline High School (IHS) Engineering and Entrepreneurship Program 'Project Lead the Way' (PLTW).

The IHS Engineering and Entrepreneurship program will provide students with the opportunity and the preparation to enter the STEM fields directly out of

high school. In an experiential setting, students who are interested in the trades will learn modern job skills that are marketable and relevant to current industries in our region. Students who plan to enroll in university engineering programs will have the engineering literacy and scaffolding needed to succeed in a rigorous course of study.

The \$50,000 in grant funds will supply some of the large equipment needed to run a state-of-the-art program. And in a show of community support, together the IHS Boosters and the American Association of University Women (AAUW) Tahoe-Nevada have backed this new engineering program by financing additional equipment essential for the first year curricula.

Like all new program launches, these funds while hugely beneficial, do not cover all the costs for this new state of the art high school program. An additional \$50,00 is needed to buy robotics kits and more powerful engineering class computers for the department. Please help us help the future by generously supporting literacy in Incline Village.
